 suryapolisetty

PROFESSIONAL SUMMARY

Co-founder & CTO with experience building technology products from concept to production, leading multidisciplinary engineering teams, establishing global manufacturing operations, and scaling end-to-end technology across hardware, software and AI.

CORE EXPERTISE

- Technology Leadership
- Business & Product Strategy
- Systems Architecture
- End-to-End Product Development
- Research & Innovation
- AI & Intelligent Systems
- Cloud Platforms & Distributed Systems
- Embedded Systems & IoT
- Hardware Design & Electronics
- Manufacturing & Supply Chain

PROFESSIONAL EXPERIENCE

2023 – Present

Mindlabs

Co-founder & CTO

- Co-founded Mindlabs and grew it from an early-stage startup into a product-focused technology company.
- Scaled the business to over **\$2M in revenue**, delivering more than **100,000 IoT devices**.
- Expanded technical ownership across hardware, embedded systems, cloud infrastructure, web and mobile applications, and manufacturing, ultimately leading end-to-end product architecture.
- Built and led multidisciplinary engineering teams to architect and deliver an end-to-end IoT platform for real-time supply chain visibility and decision-making.
- Built an end-to-end manufacturing ecosystem in China, taking products from supplier discovery to successful volume manufacturing.
- Worked closely with enterprise customers to shape product strategy and translate operational challenges into scalable technology solutions.
- Leading AI integration across the platform to enable intelligent operational decision-making.

2022 – 2023

Adapt Ideations

Software Engineer

- Led full-stack development of the company's third-generation IoT platform, architecting core platform capabilities and delivering significant improvements in performance, reliability and scalability.

2021–2022

Independent Consulting

Software Engineer

- Developed backend systems and web applications for an early-stage technology startup.

ACADEMIC & RESEARCH

2019–2021

Independent Research

Conducted interdisciplinary research in fundamental physics, mathematical logic and theoretical psychology. Developed Relativistic Logic, a novel logical framework exploring mathematical foundations for physics.

2016–2019

Indian Institute of Technology (IIT) Indore

B.Tech, Electrical Engineering

Pursued Electrical Engineering before leaving to pursue independent research full-time.

Academic distinction

AIR 2842 (99.76 percentile) in JEE Advanced 2016.
